

For bakeries, hotels, restaurants, and production facilities, the cost savings are immediate and scalable.

Why Choose Tom Chess-T Group?

- 25+ Years of Industry Experience
- Local Knowledge, National Reach
- Certified by NMDPRA
- Full-Service Delivery Model
- Competitive Pricing
- Trusted by Reputable Brands

Our projects speak louder than our proposals. Clients come back to us because we get the job done right – on time, on spec, and on budget.

What Sets Us Apart

We are not the biggest. We are simply the most consistent. Our strength lies in our ability to execute with precision, adapt to any location, and support our clients beyond the build.

- Strong in-house technical capacity
- Excellent stakeholder relationship management

- Dedicated HSE personnel
- Full regulatory navigation support

When you work with Tom Chess T Group, you get more than a contractor. You gain a long-term partner.

Ready to Start your LPG Project?

Let's build a safe, efficient, and modern LPG facility tailored to your business. Whether you're a retailer, industrial operator, estate developer, or investor, our team is ready to help you every step of the way.

...WE DO IT DIFFERENT AND THINK DIFFERENT

WELCOME TO CHESS T GROUP'S NEWSLETTER!

Welcome to the official newsletter of Tom Chess T Group of Companies Limited, where engineering excellence meets energy innovation.

For over 25 years, we have proudly led the charge in LPG infrastructure delivery across Nigeria, particularly in the dynamic South-South region.

This publication reflects our mission to build more than just gas plants. We are building a future powered by cleaner energy, safer installations, and businesses that can thrive on reliable infrastructure. From Warri to Abuja, and soon into Bayelsa and Edo States, we are leaving a track record of perfection,

performance, and partnership.

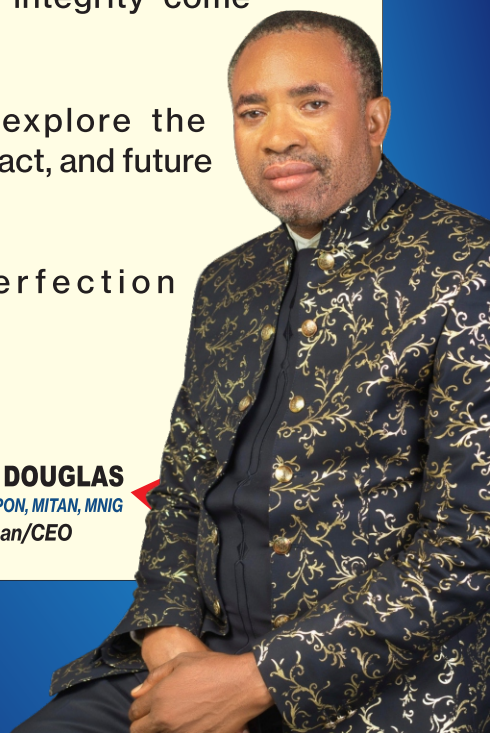

We believe in purpose-driven engineering. Every project we deliver is not just a structure, but a statement of what is possible when expertise, compliance, and integrity come together.

Join us as we explore the opportunities, impact, and future of LPG in Nigeria.

Let's build perfection together.

Warm regards,

AUC. THOMPSON O.S. DOUGLAS

Warri:

An Emerging Hub for LPG Business

Warri is fast evolving from an oil town to a modern energy hub. As demand grows for cleaner and more affordable energy alternatives, LPG is gaining ground among residential estates, restaurants, manufacturing plants, and more.

Tom Chess-T Group is deeply rooted in the South-South region, helping businesses move away from high-cost diesel, unreliable firewood, and polluting kerosene. Our local experience gives us the insight to design and deliver LPG facilities that fit Warri's unique terrain, regulatory landscape, and commercial dynamics.

Why LPG? Why Now?

Businesses today face rising operational costs. LPG offers a cleaner, safer, and more cost-effective energy source compared to traditional fuels. With government incentives, duty reductions, and growing market demand, LPG is no longer an option - it's a smart business decision.

- Reduced fuel costs by up to 30%.
- Lower maintenance and higher efficiency.
- Safe storage, clean combustion, and consistent supply.

Now is the time to make the switch.

What We Offer: Full-Spectrum LPG Infrastructure Services

At Tom Chess T Group, we don't out-source excellence. We deliver it in-house, with an integrated service model that covers:

- Feasibility Studies & Site Assessment
- Engineering Design (P&IDs, Layouts)
- Civil & Mechanical Works
- Instrumentation and Electrical Automation
- Procurement & Equipment Supply
- Regulatory Compliance & NMDPRA Support
- Installation, Testing & Commissioning
- Staff Training & Handover
- After-Sales Support & Plant Monitoring
- Retrofits and Upgrades of Existing Plants

Whether it's a mini skid plant or a full-scale industrial facility, we approach every project with the same goal: Building Perfection.

Safety, Compliance & Quality: Our DNA

Safety is not an add-on - it is the foundation of every project we handle. All our plant designs and installations comply strictly with:

- NMDPRA Regulations
- NFPA 58 Safety Code
- SON Equipment Standards
- Environmental Protection Laws

Our team implements daily safety briefings, enforces PPE protocols, and maintains full HSE oversight on-site. Pre-commissioning inspections and documentation ensure nothing is left to chance.

Client-Centric Execution: Built Around You

Every client has unique needs. That's why we tailor every project to specific site conditions, energy requirements, business size, and budget realities.

Clients trust us not only because of what we deliver, but how we deliver:

- Transparent communication
- Step-by-step progress reporting
- Flexible engagement models
- Long-term support

Our job doesn't end at handover. We remain available for servicing, upgrades, and technical consultation long after the ribbon is cut.

Our Footprint: Where we're Building Next

With a firm base in Delta State, our project expansion plan includes:

- **Bayelsa State:** Targeting new markets in logistics-based LPG services.
- **Edo State:** Supporting industrial clusters in Benin City.

- **South-South Nigeria:** Exploring urban LPG conversions for estates and restaurants.

Our capacity allows us to deploy multiple project teams across states without compromising timelines or quality.

Project Showcase

One of our landmark installations is the LPG plant extension at **Efezino Petrol Station**. This add-on facility transformed an existing fuel retail site into a dual-energy hub, creating value for the client and greater convenience for consumers.

Scope of work:

- Design, procurement, and installation
- Safety compliance and commissioning
- Staff training and regulatory filing

It is a clear example of how modular LPG plants can rapidly modernize existing infrastructure.

Let's Talk Numbers: Why LPG Saves You More

A comparative analysis shows:

- Diesel costs businesses an average of 25-35% more than LPG.
- LPG systems last longer with fewer breakdowns.

- Businesses using LPG report smoother operations and cleaner energy usage
